

Transforming Healthcare

DELIVERY ACROSS THE GLOBE

Elevating care through integrated,
secure, and scalable eHealth

EXCLUSIVE REPRESENTATIVES OF  **eWave MD**

What Is Ewave MD?

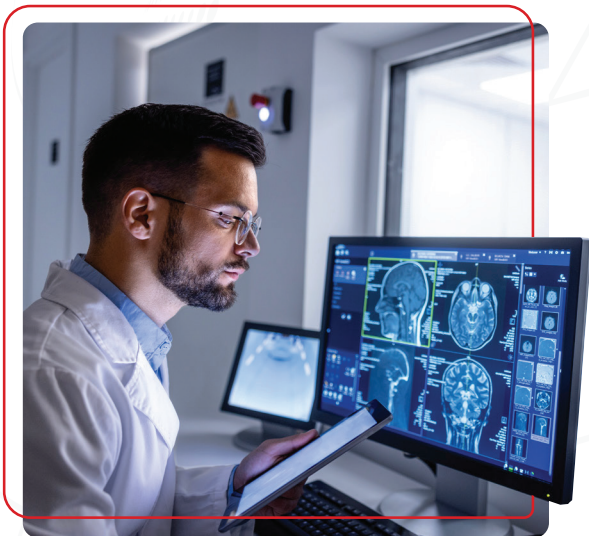

Founded in 1999, Ewave MD Medical is an international pioneer in web-based eHealth systems, driving end-to-end solutions from public health agencies and hospitals to rural clinics and pharmacies.

Our Mission

We deliver SaaS-based clinical platforms and telemedicine infrastructure, enabling healthcare providers to focus on what matters most patient outcomes.

Primary & Secondary Care Platform

- ✔ **Centralized EMR / HIS**
Manage everything from patient registration to discharge, including admissions, ER workflows, operating theaters, billing, HR, labs, and pharmacy modules all integrated in one secure database.
- ✔ **Health Promotion & CRM**
Engage patients through Medical CRM systems, portals, websites, mobile apps, and appointment scheduling tools.
- ✔ **Medical Confidentiality**
Protected workflows designed to prioritize privacy while enabling safe physician collaboration.

Telemedicine & Tele-Diagnostics

- ✔ **Virtual Consultation Platform (VCP)**
Empowers local technicians to perform basic diagnostics and enable virtual consultations with doctors and specialists reducing travel, expanding access, and creating local jobs.
- ✔ **TeleMaster Turn-Key Suite**
A flexible, scalable telemedicine platform supporting remote diagnostics, home care monitoring, kiosks, and virtual visits using any device.

Pharmaceutical Management

End-to-End Pharmacy Platform

From e-prescriptions to inventory control, procurement, claims, and drug interaction checks—especially useful for multi-branch pharmacies.

Connected Pharmacy & e-Prescriptions

Link EMR systems directly with pharmacies—automating prescription issuance, collection confirmation, substitution suggestions, rule-based flagging, and fraud prevention.

Procurement Optimization

Centralized competitive bidding across suppliers to reduce costs, ensure availability, and improve transparency.

Diagnostics & Imaging

RIS/PACS Integration:

Holistic radiology and diagnostic data management—supporting seamless workflows, security, and privacy.

Accelerated SaaS Deployment

A web-based EMR suite with scheduling, e-prescribing, patient portals, rule-based customization, and rapid deployment features.

Why Choose Ewave MD

Trusted Worldwide

Used by HMOs, hospitals, pharmacies and ministries across Israel, Europe, US and emerging markets.

ISO-Certified Quality

Developed under rigorous international standards (e.g., ISO 9001, ISO 13485) to ensure safety, reliability, and compliance.

Tangible Impact in the Field

Telemedicine deployments in rural villages helped reduce patient travel, improve access, and foster local employment.

Comprehensive Support Suite

Full lifecycle SaaS services system analysis, standards planning, customization, localization, maintenance, support, security, training, and more.

Where Can Be Used?

 **Cost & Overhead Reduction**
Reduce administrative cost and overhead with integrated, compliant systems.

 **Digital Patient Experience**
Enhance patient experience with digital-first access via portals and apps.

 **Scalability & Flexibility**
Scale from local clinics to national networks with the same core technology.

 **Enhanced Patient Safety**
Improve safety through rule-based alerts and drug-interaction engines.

 **Operational Efficiency**
Boost operational efficiency across diagnostics, pharmacy, imaging, and inpatient care.
